

Country reports from participants to the JMA/WMO Workshop on Quality Management of Surface Observations

All participating countries to the workshop are kindly requested to submit country reports about status of quality management in rainfall observation by **28 February 2018**, in [Microsoft power point file](#). They are also invited to present the country reports in a poster session of the workshop in the afternoon of 19 March 2018.

The report prepared by each country should be within eight pages, and it will be consolidated as a poster.

The expected contents of country reports (posters) are as below:

1. Challenges in rainfall observation in each country
2. Climate about rainfall (annual/monthly average rainfall)
3. Major recent rainfall-related disaster
4. Rainfall observation network
5. Utilization of rainfall observation data
6. Quality management in rainfall observation
7. Expectation for this workshop
