CONTENTS

1. Introduction 1

2. Computer System
2.1 Introduction 2
2.2 System Configuration and Specifications 2
2.3 Operational Aspects 7

3. Objective Analysis System
3.1 Summary 9
3.2 Observational Data 12
3.3 Quality Control Procedures 15
3.4 Typhoon Bogussing 17
3.5 Global Analysis 18
3.6 Regional Analysis 29
3.7 Meso-scale Analysis 34
3.8 Sea Surface Temperature Analysis for Global Model 36
3.9 Snow Depth Analysis 36
3.10 Non-real-time Quality Control 37
3.11 JMA Climate Data Assimilation System 38

4. Numerical Weather Prediction Models
4.1 Summary 39
4.2 Global Spectral Model 41
4.3 Ensemble Prediction System 67
4.4 Regional Spectral Model 72
4.5 Meso-Scale Model 90
4.6 Typhoon Model 116
4.7 Atmospheric Transport Model 123
4.8 Chemical Transport Model 127
4.9 Verification 133

5. Application Products of NWP
5.1 Summary 137
5.2 Facsimile Charts 137
5.3 GPV Products 137
5.4 Very-short-range Forecasting of Precipitation 141
5.5 Hourly Analysis 146
5.6 Guidance for Short-range Forecasting 147
5.7 Application Products for Aviation Services 155
5.8 Products of Ensemble Prediction System 159
5.9 Atmospheric Angular Momentum Functions 162

6. Sea State Models
6.1 Summary 164
6.2 Sea Surface Temperature Analysis 165
6.3 Ocean Data Assimilation System 167
6.4 El Niño Forecast Model 170
6.5 Ocean Comprehensive Analysis System 173
6.6 Ocean Wave Models 176
6.7 Storm Surge Model 184
6.8 Sea Ice Model 188
6.9 Oil Spill Prediction Model 193
